

Evaluation of the implementation process of integrated territorial tools

- 5 processes
- 5 groups of stakeholders
- 30 interviews
- 1 round table discussion

Evaluation of the implementation process of integrated territorial tools

- Establishment of cooperation in agglomerations
- High level of cooperation (vertical as well as horizontal)
- Very good communication by the Ministry of Regional Development
- Obvious advantages of coordinated development

- Subjective and spatial overlaps
- „Weak“ position of the ITI tool (the top horizontal level)
- Low level of knowledge about the aims of the ITI tool
- IT sw MS2014+
